

Reliance Hexham

HEAT TREATMENT

We have recently upgraded our furnaces to natural gas. This system offers a cost effective heat treatment system. The gas fired system is also better for the environment with a substantial reduction of green house emissions.

The upgraded furnaces allows for a more accurate, even heat treatment process. Our electronic recording system produces an accurate graph and reporting of the heat treatment process. Our furnaces are suitable for forge work, hardening & tempering, stress relieving, normalising and annealing.
